PROFESSIONAL SUMMARY

B.Tech Information Technology graduate (2025) with hands-on experience in cybersecurity operations, threat detection, network security, and vulnerability assessment. Demonstrated leadership as Team Lead during a 3-month cybersecurity internship, directing vulnerability assessment operations on a simulated business network. Deployed Wazuh SIEM on AWS EC2 for real-time log analysis and incident alerting. Built a Machine Learning-based NIDS achieving 99.5% accuracy. Skilled in SOC operations, penetration testing (VAPT), web application security, and Python-based security automation. Seeking an entry-level role as Cybersecurity Analyst, SOC Analyst, Penetration Tester, or Junior Security Engineer.

CORE COMPETENCIES

SOC Operations | SIEM (Wazuh) | Threat Detection & Analysis | Incident Response | Log Analysis | Alert Triage | Security Monitoring
Vulnerability Assessment & Penetration Testing (VAPT) | Ethical Hacking | Network Security | IDS/IPS | Firewall Administration | TCP/IP | VPN
Web Application Security (OWASP Top 10) | Cloud Security (AWS) | Endpoint Security | Python Scripting & Automation | Bash | Linux Administration

TECHNICAL SKILLS

Security Tools: Wazuh SIEM, Burp Suite, Metasploitable, Nessus, Nmap, Wireshark, Kali Linux, Splunk, OWASP Juice shop
Cloud & Infrastructure: AWS (EC2, VPC, Security Groups), Ubuntu Linux, Apache Web Server, VMware
Operating Systems: Ubuntu Linux, Kali Linux, Windows, VMware Virtual Environments
Programming & Scripting: Python (Scikit-learn, Scapy, Flask), Bash, SQL, C
Networking: TCP/IP, DNS, HTTP/S, Firewalls, VPN, Packet Analysis (Wireshark), Network Monitoring
Security Domains: SOC Operations, Threat Detection, Log Analysis, IDS/IPS, VAPT, Incident Response, Endpoint Security, Web Application Security

INTERNSHIP EXPERIENCE

Cybersecurity Intern | Zaalima Technologies Pvt Ltd (Virtual)

Present | Bangalore, Remote

- Serving as Team Lead for the vulnerability assessment project, directing end-to-end security operations on a simulated small business network and ensuring structured weekly deliverables throughout the 3-month internship.
- Undergoing structured cybersecurity training covering security operations, threat analysis, endpoint security, network defence, and vulnerability management practices.

Cybersecurity Intern | NoviTech R&D (Virtual)

Jan 2025 – Feb 2025 | Remote

- Completed intensive training in endpoint security, mobile security, network defence, attack vectors, and mitigation strategies — strengthening core information security knowledge.

Ethical Hacking Intern | Ozone Cyber Security, Trichy (Offline)

Jun 2023 – Jul 2023 | India

- Supported network vulnerability assessments and participated in simulated penetration testing exercises, gaining practical offensive security and VAPT experience.

Python Development Intern | CognoRise Infotech (Virtual)

Jul 2024 – Aug 2024 | Remote

- Developed Python scripting and automation skills applicable to security tool development, log processing, and threat analysis automation workflows.

KEY PROJECTS

Vulnerability Assessment for Small Business Network — Team Lead | *[Kali Linux, Nmap, Metasploitable2, OWASP Juice Shop, VMware] | Zaalima Development Pvt Ltd*

- Led a team-based vulnerability assessment of a simulated small business IT infrastructure, using Kali Linux and Nmap to conduct network scanning, port enumeration, and service version detection — identifying 7 critical vulnerabilities including a vsftpd 2.3.4 backdoor, exposed root shell on port 1524, and unencrypted Telnet service.
- Prioritised identified risks by severity and documented structured mitigation strategies covering patch management, service hardening, and access control improvements, delivering a comprehensive findings report with risk-rated remediation recommendations.

Wazuh SIEM Deployment on AWS EC2 | *[AWS, Wazuh, Ubuntu Linux, VPC, Bash]*

- Deployed and configured Wazuh SIEM on AWS EC2 with a custom VPC, security groups, and key-based SSH authentication, enabling centralised log collection, real-time event correlation, and automated incident alerting on Apache web server activity.
- Performed in-depth log analysis to identify indicators of compromise (IoCs) and generate actionable alerts, applying network segmentation and access control best practices across a secure cloud infrastructure.

Machine Learning Network Intrusion Detection System (NIDS) | *[Python, Scapy, Scikit-learn, Flask]*

- Engineered a real-time NIDS using Python, Scapy, and Scikit-learn achieving 99.5% detection accuracy, significantly reducing false positives and improving threat identification speed across multiple attack types.
- Built a Flask-based SOC-style dashboard enabling live packet capture, threat visualisation, and automated security alerting — simulating real-world intrusion scenarios for continuous network monitoring.

Phishing Website Detection using Machine Learning | *[Python, Flask, Random Forest]*

- Developed a Flask web application to classify phishing URLs using a Random Forest algorithm, applying dataset balancing techniques to improve model precision and recall.

Vulnerability Assessment & Penetration Testing (VAPT) Lab | *[Burp Suite, Metasploit, Nmap, Wireshark, VMware] | Ozone Cybersecurity*

- Conducted end-to-end VAPT in an isolated VMware lab, identifying and exploiting critical vulnerabilities including SQL Injection, IDOR, and Session Fixation using Burp Suite, Nmap, and Metasploit.
- Documented all findings with risk ratings and remediation recommendations following OWASP Top 10 guidelines, producing a structured vulnerability report with prioritised mitigation steps.

EDUCATION

B.Tech in Information Technology 2021 – 2025

Adithya Institute of Technology, Coimbatore | CGPA: 7.347 / 10

HSE (Higher Secondary Education) 2021

St. Joseph's Anglo-Indian Girls' Hr Sec School, Trichy | Percentage: 85%

SSLC (10th Standard) 2019

Shakespeare Matriculation School, Trichy | Percentage: 81%

CERTIFICATIONS

- Networking and Cybersecurity Essentials – Cisco (TNSDC)
- Google Cybersecurity Professional Certificate (In Progress) – Google / Coursera
